

Payment Analytics Report — zeptomarketplace

Generated on 5/28/2026, 11:01:33 AM

Executive Summary

The order AGPDBTLZZF2UHE3C3TYB62GUUA, placed on May 16th, experienced a delay in auto-refund initiation until May 27th due to a conflicted transaction. The transaction was initially processed without any immediate issues, but a discrepancy between Juspay's internal records and the payment gateway (LazyPay) status led to the ``is_conflicted`` flag being set to TRUE. This conflict was detected after an extended period of waiting for a final status from LazyPay, which did not provide a clear settled or failed confirmation. As a result, Juspay's system automatically triggered an auto-refund to protect the customer. The root cause of the delay was the late detection of the conflict, which could have been caused by delays or mismatches in status updates between systems. Juspay's automated conflict detection system ensures financial discrepancies are resolved through auto-refunds when such issues arise. Recommendations include improving real-time reconciliation processes, enhancing communication protocols with payment gateways, and implementing stricter monitoring of pending transactions to minimize delays in conflict detection and resolution.

Auto-Refund Delay Duration

Auto-Refund Delay Duration

11 days

Time between order placement (May 16) and auto-refund initiation (May 27).

Transaction Status Timeline

Date	System	Status	Description
May 16	Juspay	Order Created	Order created successfully in Juspay system.
May 16	LazyPay	Initiation Successful	Order initiation acknowledged by LazyPay.
May 16	Juspay	PENDING_VBV	Transaction pending verification.

Date	System	Status	Description
May 16	LazyPay	Acknowledged	Gateway received transaction details.
May 27	Juspay	AUTO_REFUNDED	Conflict detected; auto-refund triggered.

Stepwise timeline of transaction statuses in Juspay and LazyPay systems.

Conflicted Flag Trigger

Conflicted Flag Trigger

Missing Gateway Confirmation

The `is\_conflicted` flag was set due to a lack of final status from LazyPay.
